Queen Victoria - Surface Printed 2½d (visible plate number) Issue.

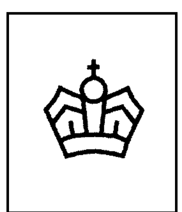

The 2½d value, appearing so late in the 'Surface Printed' era, managed to skip the preamble of 'No corner letters' - 'Small white corner letters' - 'Large white corner letters', coming straight in at the 'Large coloured corner letter' stage. The original plate layout had 192 impressions arranged in two vertically aligned panes, with each pane having eight rows of twelve stamps. The 2½d Rosy-mauve stamp was first issued on ***1st July 1875*** using 'Small anchor' watermarked paper, which changed to 'Orb' on ***1st May 1876***. Plate 3 was in use at the changeover, and so can be found with both watermarks.

A change of colour from Rosy-mauve to Blue was also necessitated, and as Plate 17 was in use at the time, it can be found in both colours. The Blue stamps were issued on ***5th February 1880***. Plate 17 saw 5,000 sheets printed in Rosy-mauve, and 30,000 in Blue.

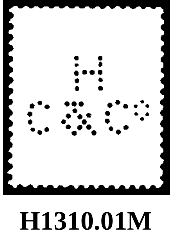

The final variation in the issue was a change to the use of 'Imperial Crown' watermarked paper, still with two vertically aligned panes, but this time each consisting of 120 stamps arranged in ten rows of twelve. Stamps with the 'Imperial Crown' watermark were introduced ***23rd March 1881***. Only plates 21-23 were used with 'Imperial Crown' watermarked paper.

Just two Perfin dies can be found on ***all twenty-three plates***, including ***both colours*** on ***plate 17***.

No attempt has been made in the table above to differentiate between the two watermarks found on ***Plate 3***. However, a Table is shown on the next page if you would like to help assign the correct watermark to the ***75*** Perfin dies known on ***plate 3***.

* Figure includes ***20 stamps*** for which the precise colour of plate 17 is not known.

Perfin figures are correct to ***1st July 2018***.

Note:

Plates 22 and 23 were both printed from ***at the same time***, with each of the two sets of 240 impressions printed onto a 480 set 'mill' sheet. Plate 22 printed the right-hand side, and plate 23 the left. It can be seen from the table above that both plates are significantly more plentiful than any of the others with regard to their use with Perfins. In fact, knowing how they were printed, you could expect the figures to be identical!

If you would like to help separate the two watermarks involved in the ***76*** examples of Perfins found on ***plate 3***, then these are the Perfin Dies to check:
